Afternoon and Hello,

The UG lab systems will be refreshed shortly. The starting base will be a bare system with Windows, Office and Chrome/Edge browser. The additional software to be added will depend on your requests, see attached form and email your requests to forestry.ithelp@ubc.ca. If you do not reply with your requested teaching software, it will not be installed. Do not assume it will be installed, the *modus operandi* is to install just what is requested, nothing more. Why will be more clear as you read on. New requests that involve a cost will be sent to the Associate Dean Academic and the Dean for approval, any Open Source software requests will be review for indemnity and conflict issues before they are added to the install base.

Anyone teaching summer courses in May-August should contact I via forestry.ithelp@ubc.ca immediately with your software needs.

Items and dates to be aware of.

- Summer renovations:
  - FSC 1406 out of service until renos are done,
  - FSC 1404 remote use only until FSC 1406 renos are done,
  - FSC 2942 is not impacted, open for in person use only.
- Complete the form and email to forestry.ithelp@ubc.ca before or on June 1st 2022.
  - Note that Hybrid represents if the course is remote or mixed remote/in person use
- Software versions will be what is available as of June 1st. To ensure your teaching materials work, ensure your office machine version matches that of the UG labs. Expect the versions in the UG labs to stay static for the entire year unless there is a bug or a cyber risk issue. OS and Office and web browsers are excluded, these are immediately updated when updates appear.
- Hybrid teaching is still limited to 7 machines. Attempts to increase this number will be investigated this summer, TBA. For the summer only, FSC 1404 will be available for remote access, 21 seats.
- Trimble software is known to conflict with Remsoft Woodstock. Trimble will be restricted to FSC 1404/6 labs and Remsoft Woodstock is restricted to the FSC 2942 lab. The vendors informed I that I have no choice in the matter, they will not co-exist and they will not fix the issue.
- Requests can be rejected if there are compatibility issues that we are unable to resolve.

That is all,
Carl

Please provide the following information if you are requesting new software for teaching in the Forestry Undergraduate Teaching Labs.

Requestor:

Course Code: Hybrid mode:

Labs: FSC 1404   FSC 1406   FSC 2942

Software Required

ArcGIS Pro	ENVI	eCognition	SPSS
Office 2021	NVivo	CBM-CFS3	
PatchWorks	QGIS	R	RStudio
Rhino 3D	RoadEng	SAS	StetchUp
Site Tools	TIPSY	VDYP	Woodlot
Woodstock			
AutoCAD	3ds Max	Inventor	
Revit	Hundegger	MasterCAM	
SolidWorks	WoodWOP5	Xilog Plus	
Other			

New requests, go to next page.

New Software Package name:

Vendor URL:

Needed by: Rationale for request:

All requests will be considered but there is no guaranty that the request will be granted.

Email completed form to forestry.ithelp@ubc.ca
